About Me

I am a Systems Engineering student with experience in software development and technical projects using various technologies such as Java, Python, Angular, Spring Boot, and Go. Passionate about continuous improvement and the practical application of knowledge in real-world projects.

Experience

Freelancer (6 months)

- **Law Firm Website**
Design and implementation of a professional platform for a law firm, focused on presenting legal services and digital presence.
- **Warehouse Management System**
Development of a comprehensive system for inventory control, incoming and outgoing goods, optimizing warehouse logistics.

University Projects

- **Custom Compiler – Simple Language (Java + JFlex + CUP)**
Development of a basic compiler for a JavaScript-like language. Lexical, syntactic and semantic analysis, intermediate code generation and symbol table management.
- **Sports Tournament Platform (Angular + Spring Boot + MySQL)**
Tournament, player and team management with round-robin match generation and complex entity relationships.
- **Ojo Vigilante (Python, Kivy, OpenCV, MediaPipe)**
Fatigue accident prevention while driving using MediaPipe Face Mesh and EAR calculation for drowsiness alerts.

Certifications

- Udemy**
- MySQL
 - Angular
- CodigoFacilito**
- Go
 - Spring Boot
 - Docker

I consent to the processing of my personal data for the selection process of the position I am applying for.
